Sir:

Applicant hereby requests the Commissioner to correct three errors in the above referenced patent.

The first error is located in column 12, line 5 (claim 1), where "the reflector and an image display light valve element" is incorrect. the entire line should read:

"the reflector to an image display light valve element"

This error was a typographical mistake made in the amendment filed on May 14, 2004. In line 4 of claim 1 the phrase "at least one dichroic mirror and" was to be struck out. Instead, the words "to at least one dichroic mirror" was struck out.

The second error is in conditional express (2) found at column 12, line 16 where "f=L2" is incorrect. The entire line should read:

$$f=L/2 \qquad (2)$$

This error was a typographical mistake made in the amendment filed on September 21, 2005 where the slash(/) was omitted.

These errors was made without deceptive intent, and the prosecution clearly reflects the intent of Applicant. It is therefore respectfully requested that the Certificate of Correction be issued. It is respectfully submitted that the requested change does not materially affect the scope or the meaning of the patent.

The third error is located in column 12, line 24 (claim 1) where the word "off" is incorrect. The entire line should read:

"L is the distance between the optical axis of luminous flux"

This error appears to be made by the US Patent & Trademark Office in printing this patent. Our records indicate that this line was correct in the Amendment filed on September 21, 2004.

It is respectfully requested that the Certificate of Correction be issued. Two copies of PTO/SB/44 (formerly PTO-1050) are attached.

Applicant submits with this request the fee of \$100.00 (Fee Code 1811) required by 37 CFR § 1.20(a). Still further, if there is any error in the fee, the Commissioner is authorized to charged the undersigned's Deposit Account No. 19-2816. A duplicate copy of this paper is attached.

Respectfully submitted,
